

CHILE NATIVO TRAVEL SUSTAINABILITY POLICY

We are nature lovers and enthusiasts of the destinations we share with the world. Therefore, our commitment is to care for and regenerate these places, maintaining high standards in our operation for those who choose us, our internal and external collaborators, local stakeholders, and adventure entrepreneurs who contribute to the territory's sophistication.

We aim to grow with happiness and expand people's horizons. To achieve this, we commit to:

- Incorporate the "Circular Travel" model with circular tools in our processes to advance towards sustainability.
- Move towards carbon neutrality in our travels and encourage our travelers to offset their journey to the destination.
- Minimize our environmental impact in the territories by managing our waste to progress towards the "zero waste" concept.
- Develop tourist products that diversify the destination.
- Integrate the rich heritage of the territories we visit into the narratives of our guides.
- Support local enterprises to contribute to the regeneration of the local economy through fair trade principles.
- Include activities offered by indigenous communities in our programs.
- Apply the Code of Ethics for Responsible Tourism and establish our standards.
- Contribute to local causes that protect biodiversity and promote its regeneration.
- Educate our travelers to engage in responsible travel.
